

Serenity 30

Serenity 30 is a soft landscape grass used for domestic installation manufactured from TigerCool yarn, Serenity is cooler than most synthetic grasses by up to 15%. Serenity has the added benefits of being olive green replicating a natural lawn and de-lusted so you don't get that shiny look. A stunning alternative to natural grass, Serenity is soft under foot so perfect for the front yard or backyard installation.

TigerCool yarns are engineered with heat reflective color pigments and advanced U.V. inhibitors that reduce surface temperatures. Solar panel tests indicate that artificial grass featuring TigerCool technology successfully reduces turf temperatures by 15% and up to 10 degrees celsius! That's a difference that you can feel.

- // TigerCool technology successfully reduces synthetic turf temperatures
- // Looks and feels like the real thing
- // No watering, mowing or fertilising required
- // 10 year warranty

Serenity 30

For the owners

- // **No** watering, mowing or fertilising required.
- // Child and pet friendly.
- // **UV stabilised** to minimise fading.
- // Recommended use: low to moderate traffic.
